SUMMARY

I'm a people-focused technical professional with a strong background in client-facing roles across software development, business intelligence, and technical consulting environments. Experienced in working directly with stakeholders, and end users to understand needs, communicate solutions, and deliver results in fast-paced, deadline-driven settings at Dye & Durham, the Centre for Addiction and Mental Health (CAMH), and Dundas Data Visualization.

I have a proven ability to build strong relationships through mentoring, training, and hands-on support, including delivering face-to-face training and development workshops to learners and clients in technical environments. Skilled at quickly understanding requirements, troubleshooting problems, and communicating complex technical concepts in a clear and approachable way. I bring a consultative, service-oriented approach with a focus on engagement, relationship-building, and delivering high-quality outcomes in collaborative team environments.

EXPERIENCE

FRONT-END DEVELOPER | TORONTO, ON

NOV 2022 – FEB 2025

- Led front-end development for the *NoticeConnect* platform, aligning UI/UX architecture with Dye & Durham enterprise standards and design systems
- Modernized and maintained the application using Vue.js and Vite, improving performance, scalability, and developer efficiency
- Contributed to backend development and feature updates within a Django-based environment, supporting end-to-end system improvements
- Resolved user-reported issues and platform bugs through responsive support ticket management, enhancing reliability and user experience

STUDENT MENTOR | VANCOUVER, BC

MAR 2022 – JUL 2022

- Provided 1:1 mentoring sessions for students at the Lighthouse Labs Web Development Bootcamp
- Assisted students with debugging code and solving technical problems with Node.js, React, JavaScript and HTML/CSS
- Encourage best practices in coding, version control, and responsive design

BUSINESS INTELLIGENCE DEVELOPER |CENTRE FOR ADDICTION AND MENTAL HEALTH (CAMH) |TORONTO, ON

JAN 2019 – MAR 2021

- Developed and maintained interactive dashboards and reports to support clinical, research, and operational decision-making using Dundas BI and Tableau
- Collaborated with stakeholders to gather requirements and deliver tailored data solutions
- Designed and optimized data models and queries to ensure data accuracy, integrity, and accessibility
- Integrated data from multiple sources to support
- Dashboards and reports
- Lead the design and development of the COVID-19 National Survey Dashboard
- Ensured adherence to data governance, privacy, and healthcare data standards

SENIOR BUSINESS INTELLIGENCE CONSULTANT | DUNDAS DATA VISUALIZATION INC |TORONTO, ON

JAN 2015 – JAN 2019

- Lead end-to-end BI solution delivery using Dundas BI, including dashboard design, reporting, and data visualization
- Work directly with clients to gather requirements and translate business needs into technical solutions
- Design and develop data models, ETL processes, and integrations across multiple data sources
- Build and customize interactive dashboards, scorecards, and analytics applications
- Provide expert guidance on BI architecture, performance optimization, and best practices
- Analyze business data to identify trends, KPIs, and opportunities for performance improvement
- Troubleshoot and resolve data, performance, and visualization issues
- Lead client raining sessions on BI tools and solutions, often travelling to clients to train and develop dashboards and reports.
- Ensure data accuracy, governance, and security standards are maintained
- Major clients included IBM, CAMH, Pepperidge Farm, Des Moines University

EDUCATION

LIGHTHOUSE LABS

VANCOUVER, BC | WEB DEVELOPMENT BOOTCAMP

OCT 2021 – JAN 2022

- Completed intensive full-stack web development bootcamp at Lighthouse Labs
- Built responsive web applications using HTML, CSS, JavaScript, React, and Node.js
- Applied software engineering principles, debugging, and version control (Git)
- Developed projects through hands-on, project-based and pair programming approaches
- Gained practical, job-ready skills for modern web development environments

GEROGE BROWN COLLEGE

TORONTO, ON | COMPUTER PROGRAMMER ANALYST

JAN 2012 – APR 2014

- Completed Computer Programming and Analysis advanced diploma at George Brown College
- Built applications using languages such as Java, C#, JavaScript, and SQL
- Developed full-stack projects with database design and integration
- Applied software development lifecycle (SDLC), testing, and debugging techniques
- Worked with version control tools (Git) and collaborative development practices
- Strengthened problem-solving, analytical thinking, and team collaboration skills

PROJECTS

Colour Pickr – a system-wide colour picker using the Eye Dropper API

The Office Quiz – React/Node full-stack app

Fantasy Radar – web scrapping tool that utilizes Twilio API for alerts

Scheduler – interview booking app built with React/Postgres

TinyApp – URL shortener built using Node/Express
