

SUMMARY

- People-focused technical professional with extensive experience in client-facing delivery, stakeholder engagement, technical qualification, and relationship management across enterprise and consulting environments.
- Brings a strong technical foundation that enables effective evaluation of technical requirements, assessment of candidate fit, and high-quality communication between candidates, account managers, and clients.
- Experienced in working within deadline-driven, performance-focused environments, supporting multiple priorities while maintaining strong service standards and long-term relationships

CORE SKILLS & COMPETENCIES

- Technical requirements intake & role clarification
- Candidate qualification & assessment mindset
- Stakeholder & client relationship management
- Interview-style questioning & evaluation
- High-volume, time-sensitive delivery
- Clear communication of complex technical concepts
- Documentation, follow-up & process compliance
- Collaboration with sales, delivery & leadership teams
- Technical sourcing understanding & market awareness

PROFESSIONAL EXPERIENCE

Front-End Developer

Dye & Durham – Toronto, ON, Nov 2022 – Feb 2025

- Worked closely with internal stakeholders and external users to gather requirements, clarify expectations, and deliver aligned solutions, mirroring recruiter job intake and candidate-fit discovery
- Regularly discussed scope, timelines, priorities, and constraints — building skills directly transferable to account management and candidate/client alignment
- Investigated user-reported issues by asking targeted questions, identifying root causes, and communicating next steps clearly
- Managed multiple priorities simultaneously while meeting delivery deadlines in a performance-driven environment
- Developed strong follow-up, documentation, and communication habits essential for recruitment workflows

Student Mentor (Technical Assessment & Coaching)

Lighthouse Labs – Vancouver, BC, Mar 2022 – Jul 2022

- Conducted structured 1:1 assessment sessions evaluating students' technical skills, problem-solving approach, and readiness
- Asked behavioral and technical questions to uncover gaps, strengths, and growth areas — closely aligned with technical screening interviews
- Provided clear feedback, guidance, and coaching while building trust and rapport
- Maintained ongoing engagement with students throughout their learning journey, similar to candidate relationship management

Business Intelligence Developer

Centre for Addiction and Mental Health (CAMH) – Toronto, ON, Jan 2019 – Mar 2021

ABDI ELMi

647 – 821 – 1942

abdi.elmi@rocketmail.com

<https://www.linkedin.com/in/elmi->

- Partnered with clinicians, researchers, and leadership stakeholders to translate business needs into technical requirements
- Conducted discovery sessions to understand goals, constraints, and success criteria — directly transferable to recruiter intake calls
- Balanced multiple deliverables in a time-sensitive, high-accountability environment
- Demonstrated discretion, professionalism, and accuracy when handling sensitive information

Senior Business Intelligence Consultant

Dundas Data Visualization Inc. – Toronto, ON, Jan 2015 – Jan 2019

- Served as a trusted consultant to enterprise clients including IBM, CAMH, and Pepperidge Farm
- Led stakeholder interviews to identify requirements, priorities, and fit — closely aligned with candidate qualification and job order analysis
- Delivered presentations, training sessions, and workshops requiring strong communication and persuasion skills
- Managed multiple client engagements while meeting deadlines and maintaining client satisfaction in a billable, performance-based environment

TECHNICAL KNOWLEDGE

- Front-End: Vue.js, React, JavaScript, HTML/CSS
- Back-End Exposure: Node.js, Django
- Data & BI: Dundas BI, Tableau, SQL
- Strong understanding of modern developer, data, and analytics roles, tech stacks, and workflows
- Familiarity with ATS concepts, LinkedIn sourcing, online databases, and AI-assisted tools through hands-on professional use
